Sleep and Rest for Children

POLICY

POLICY STATEMENT

Our organisation ensures the safety, health and wellbeing of all children attending our service and provides appropriate opportunities to meet each child's need for sleep, rest and relaxation.

BACKGROUND

The *Education and Care Services National Regulations* requires approved providers to ensure their services have policies and procedures in place for children's sleep and rest. This policy sets out how the organisation provides regular sleep and rest periods which follow recommendations on safe sleeping practices for infants and children, and takes into consideration the ages, development and needs of individual children and their families.

LEGISLATION

- National Law Act – 165, 167
- National Regulations – 77, 81, 82, 84, 87, 103, 105–107, 110, 115, 162, 168, 170–172
- National Quality Standard – 2.1.1, 2.1.2, 3.1.1, 3.1.2, 5.1.2, 6.1.2, 6.1.3, 7.1.3

RELEVANT POLICIES

- Administration of First Aid
- Dealing with Complaints
- Dealing with Infectious Diseases
- Dealing with Medical Conditions
- Emergency and Evacuation
- Enrolment and Orientation
- Governance and Management
- Health, Safety and Wellbeing
- Incident, Injury, Trauma & Illness
- Interactions with Children
- Providing a Child-Safe Environment
- Staffing Arrangements

LOCATION OF INFORMATION

- Centre Policy and Procedure Handbook
- Glen Iris Childcare and Kindergarten Website

MONITORING AND REVIEW

This policy is required to be reviewed at least annually by the approved provider, in conjunction with nominated supervisors, responsible persons, educators, staff members, parents, guardians, families and children.

- Dates of Review: January 2024
January 2023
January 2022

Sleep and Rest for Children

PROCEDURES

Our organisation defines 'rest' as a period of inactivity, solitude, calmness or tranquillity, and can include a child being in a state of sleep. Considering the busy and energetic nature of a child's day, we feel that it is important for children to participate in a quiet rest period during the day in order to rest, relax and recharge their body. Effective rest and sleep procedures are important factors in ensuring a child feels secure and safe in an early childhood environment.

ASSESSING RISK FOR SLEEP AND REST TIMES

- The approved provider must conduct a sleep and rest risk assessment at least once every 12 months, and as soon as practicable after becoming aware of any circumstance that may affect the safety, health and wellbeing of children during sleep and rest.
- The risk assessment may include, but not be limited to:
 - Individual needs of the children
 - Location of the sleep and rest space
 - Environment
 - Equipment used
 - Supervision practices
 - Ventilation & lighting
 - Staff understanding of the *Sleep and Rest for Children* policy

SAFE EQUIPMENT

- All equipment used must meet Australian Standards for sleep.
- Bassinets, hammocks, bouncers, prams and strollers are not considered safe equipment to sleep in and cannot be considered a substitute for a cot. Bassinets are prohibited in the service.
- Equipment will not be used in a way that it was not originally intended.
- Equipment will not be used if it has been recalled.
- Ensure mattresses are kept in good condition. They should be clean, firm and flat, and fit a cot base with not more than a 20mm gap between the mattress sides and ends.
- Mattresses should never be elevated or tilted.
- Portacots should only be used as a temporary measure, if all regular cots are unavailable.

CHILDREN IN COTS

- Children will not be put in cots or to bed with bottles. They will be given their bottles before going to bed.
- On occasions where staff are unable to remain beside children who are sleeping or resting, staff will ensure they are always within sight and hearing distance.

Glen Iris Childcare and Kindergarten

330-332 Warrigal Road, Glen Iris VIC 3146 – (03) 9889 8396

glenirisccc@bigpond.com
www.glenirischildcare.com.au

- Children will be physically checked on at least every 10 minutes by checking the rise and fall of their chests and their lip and skin colour.
- CCTV, audio monitors and heart monitors are prohibited at the service and must not replace physical checks.
- Ensure that cot mattresses are clean, firm and the correct size for the cot frame.
- Make up cots that comply with Red Nose and SIDS safe sleeping guidelines.
- Babies or children should not share cots, beds or bedding at any time.
- Babies will be placed on their backs to sleep but they will be able to find their own sleeping position once they are able to roll and change position.
- No loose bedding is to be available to the child.
- Bed linen will be firmly tucked under the mattress to reduce the risk of the child covering their face.
- Put the baby's feet at the bottom of the cot so the baby cannot slip down under the covers.
- Tuck the baby in securely so bed linen is not loose.
- Remove doonas, duvets, pillows and cot bumpers from the cot.
- Encourage the use of sleeping bags for babies with fitted neck and armholes so there is no risk of the child's face being covered.
- If a baby is not being wrapped at home, this should not be introduced or practiced in early childhood services.
- Securely lock cot sides into place to ensure children's safety.
- Be aware of manual handling practices when lifting babies in and out of cots.

BABIES AND TODDLERS

- Babies should be placed on their back to sleep when first being settled. Once a baby has been observed to repeatedly roll from back to front and back again on their own, they can be left to find their own preferred sleep or rest position.
- Babies aged younger than 5–6 months, who have not been observed to repeatedly roll from back to front and back again on their own, should be re-positioned onto their back when they roll onto their front or side.
- If a medical condition exists that prevents a baby from being placed on their back, the alternative practice should be confirmed in writing with the service, by the child's medical practitioner.
- At no time should a baby's face or head be covered, *e.g., with linen or a sleep toy.*
- To prevent a baby from wriggling down under bed linen, they should be positioned with their feet at the bottom of the cot.
- If a dummy falls out of a baby's mouth during sleep, it should not be re-inserted.

Glen Iris Childcare and Kindergarten

330-332 Warrigal Road, Glen Iris VIC 3146 – (03) 9889 8396

glenirisccc@bigpond.com
www.glenirischildcare.com.au

- If a baby is wrapped when sleeping, consider the baby's stage of development. Leave their arms free once the startle reflex disappears at around three months of age, and discontinue the use of a wrap when the baby can roll from back to tummy to back again (usually four to six months of age).
- Use only lightweight wraps such as cotton or muslin.

CHILDREN AGED 3-5 YEARS

- Current recommendations for children aged 3-5 years suggest that around 10-13 hours of sleep each day is typical. This is primarily made up of night-time sleep, but for some children will also include a daytime nap. For children who do nap during this period, the average duration of napping is around 1 hour.
- Children who no longer need a nap, or at least don't need one every day, should still be offered some time during the day for rest, recuperation, or to have 'down time' to relax. They can be encouraged to socialise with peers through quiet games, puzzles and books.
- It is normal for children in this age group to no longer need a daytime sleep.

TRANSITION TO SLEEP AND REST

- Children's faces and hands are to be washed before transitioning to sleep or rest. Encourage older children to do this for themselves.
- Remove excess clothing including hooded clothing, jewellery, *e.g.*, *amber teething necklaces and bracelets*, bibs and shoes from all children. Encourage older children to do this for themselves.
- Ensure clothing is appropriate to the season and room temperature. If children change clothes, respect their need for privacy.
- Ensure staff are always within sight and hearing distance of sleeping and resting children. There must be sufficient lighting for staff to be able to assess the colour of children's skin and enable children to undertake quiet activities.
- Provide well-ventilated areas for sleeping and resting.
- Children can use safe security items, *e.g.*, *dummies, soft toys*, at sleep and rest times to ensure they feel safe and secure in their environment. However, safe sleeping recommendations must be adhered to, and children are to be physically checked on as per active supervision procedures.

SUPERVISION DURING SLEEP AND REST

- The space used for rest and sleep will have adequate light and ventilation so staff can supervise each child effectively.
- Active supervision will take place when children are sleeping or resting so that staff can monitor their safety and wellbeing, and respond immediately when a child is distressed or in a hazardous situation.
- Children will be physically checked on at least every 10 minutes by checking the rise and fall of their chests and their lip and skin colour.

TRANSITION FROM SLEEP AND REST

- Acknowledge children as they wake.

Glen Iris Childcare and Kindergarten

330-332 Warrigal Road, Glen Iris VIC 3146 – (03) 9889 8396

glenirisccc@bigpond.com
www.glenirischildcare.com.au

- Dress children once they are awake and alert. Ensure children's clothing is appropriate to the season and temperature. Encourage older children to dress themselves. If children change clothes, respect their need for privacy.
- Prior to children moving to quiet learning experiences, encourage them to remove the bed linen and place it in their sleep bag.
- Store linen appropriately to prevent cross contamination.
- Clean mattresses with an approved disinfectant and store safely at the end of rest time.
- Linen is to be laundered after the child's last day of attendance each week. It is not to be shared by children without prior washing
- Remake cot if the baby is returning to the service the following day. If not, prepare the cot for the baby in attendance on the next day.
- Sanitise the mattress after the child's last day of attendance for the week with an approved disinfectant. If a mattress or bed is soiled at any time, an approved disinfectant must be used for cleaning to minimise contamination.

COMMUNICATION WITH FAMILIES

- Our organisation will consult with families about their child's individual sleep requirements, ensuring sensitivity to the different values, parenting beliefs, cultural practices or opinions associated with sleep and rest.
- Current safe sleeping recommendations state that nothing is to be placed around the neck of a sleeping child as this could tighten during sleep, make breathing difficult and may even lead to strangulation. This includes amber teething necklaces and cultural necklaces. Items such as these will be removed when a child is sleeping or resting.
- If there is conflict with current safe sleeping recommendations, the approved provider will determine if there are exceptional circumstances that allow for alternate practices, and if these are supported by the recommendations of the child's medical practitioner.
- Raise awareness about contemporary sleep and rest practices that are being modelled in the service as well as sharing this policy.

ROLES AND RESPONSIBILITIES

Approved Provider	<ul style="list-style-type: none">• Ensure that the needs for sleep and rest of children are met, having regard to the ages, developmental stages and individual needs of the children.• Ensure that children's health, safety and wellbeing are upheld at all times.• Ensure all equipment meets Australian Standards.• Ensure there are adequate numbers of cots, cot mattresses, beds and bedding available to children that meet Australian Standards, and are in great condition.• Ensure that environments being used for sleep and rest:<ul style="list-style-type: none">○ are well-ventilated○ have adequate natural light○ are maintained at a temperature that ensures the safety and wellbeing of children○ are designed to facilitate supervision○ are kept free from cigarette, tobacco or vapour smoke.
